

KEY VOCABULARY

alive	a plant or animal that is alive <b>moves, grows and reproduces</b>
dead	something that was a living thing but is <b>no longer alive</b>
habitat	a <b>place</b> where plants or animals live
microhabitat	a <b>very small part of a bigger habitat</b> , e.g., woodlice living under stones in a garden
adaptation	many plants and animals have adapted so they can <b>survive in a particular habitat</b>
food chain	a food chain is a diagram which shows us <b>how animals are linked by what they eat, and what eats them</b> : energy and nutrients are transferred around the food chain
producer	plants are called producers because they <b>produce their own food</b> : food chains start with a producer (plant), nutrients and energy are transferred to the consumer
consumer	a consumer is a plant/animal that <b>eats another plant or animal</b>

food chain:

a micro-habitat

earth worms

earthworms help to break down dead matter and provide nutrients for the soil
